*Winter Wonderland patterns designed by Chelly Wood*

- Print out pattern pieces on 8.5" X 11" (letter size) paper. Make sure to print at actual size (100%). Check the 1" reference lines on the pattern pages against a ruler, to ensure you have printed them out at the proper scale.
- Separate the pattern pieces, cutting them out on the solid perimeter lines. Patterns that are larger than letter size paper will be printed on multiple pages and need to be assembled. Line up segmented pieces and tape them together.
- Lay out pieces on fabric, making sure to line up the pattern pieces parallel to the grainline (arrow on pattern pieces). Pin down pieces and cut them out of fabric.

# Ski Boots Pattern

# Ski Boots Instructions

1. Print and cut out **Ski Boots Pattern**

2. Cut out the pieces as shown, using felt.

3. Place inner-leg pieces on top of ski boot wrap-around pieces.

4. Sew from the top of the boot to the toe, where the inner boot and wrap-around pieces meet at the front of the boot.

5. Press the seam open.

6. Use a washable fabric marker to mark the tip of the boot's sole, where the arrow is pointing.

7. Begin sewing the sole to the upper portion of the boot at the point where you've marked. Match the seam in the upper boot with the marked point at the tip of the sole.

Here is the same boot, looking from the top:

Attach the wrap-around section FIRST (sew from A to C). Then, sew the shorter portion (from A to B).

## Ski Boots Instructions continued

Keep stitching the inner-leg piece to the sole, even after it starts to overlap the wrap-around piece.

Now you should have two boots that look like this:

- 8.** Use a chopstick or bamboo knitting needle to invert the boots. Now the wrap-around piece will appear to wrap towards the front:

- 9.** Stitch three snaps along the edge of the felt for a primary closure.

We'll be using double-folded 1/4" (6 mm) bias tape for boot's straps. I used royal blue, but any color will work.

- 10.** Cut six strips of double-folded bias tape, 3" (7.5 cm) long each.

- 11.** Pin the bias tape to both sides of the boot first to make sure you've positioned it correctly.

- 12.** Use a whip stitch to attach the boot strap (bias tape) to the side of the boot that doesn't have snaps.

## Ski Boots Instructions continued

- 13.** Attach three strips of bias tape to each boot using the whipstitch.

When it's all snapped up, the boot looks like this!

- 14.** Attach very small snaps (size 4/0) to the bias tape and its corresponding position on the boot's wrap-around flap.
